KaPre® ExAlt	1 pint

7th Month

Product	Per Acre Application Rates
LidoQuest® Citrus Special 18-20-22	8.3 pounds
Krystal Klear® Agra Mix 3	1 quart
KaPre® ExAlt	1 pint

8th Month

Product	Per Acre Application Rates
LidoQuest® Citrus Special 18-20-22	8.3 pounds
Krystal Klear® Agra Mix 3	1 quart
KaPre® ExAlt	1 pint

Notes

- NutriSmart-B is soil applied.
- Prudent Citrus, Nutrol, Krystal Klear Agra Mix 3 and LidoQuest Citrus Special 18-20-22 are foliarly applied.
- KaPre ExAlt is applied through micro-jets.
- Reduce first soil-applied fertilizer rate after making the initial NutriSmart-B application by 25-50%. Reduce subsequent soil applied NPK applications by 10-20%.
- If possible, make first NutriSmart-B application two weeks before making first fertilizer application.
- Do not apply glyphosate products after June 1 until after harvest.
- Reduce herbicide rates by 25-50% and apply with Argosy®-RF rain-fast adjuvant at 1-2 quarts per 100 gallons of spray solution.

This is a basic program. Additional foliar applications may be required during the season.
