CAUTION: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS: None

This product has been reviewed and was found to be non-hazardous per the GHS Standard.

CAUTION: Treated surfaces are extremely slippery

WARNING: Do NOT Mix with oxidizers, alkaline soaps and detergents

Product expires 1 year from date of manufacture.

General Information

Argosy RF is a polymer adjuvant, which when placed into solution with water and mixed with appropriate agricultural chemicals, enhances wetting, adhesion, and facilitates the distribution with ambient moisture, thereby increasing protection during plant growth. Provides protection against phytotoxicity, and aids as a drift retardant. Some thermal protection may also be provided at higher concentrations. **Argosy RF** should be applied with the first and all subsequent sprays. **Argosy RF** aids in fruit, foliar and systemic applications. The use of **Argosy RF** allows longer durations between chemical applications, resulting in less total chemical usage.

Application Instructions

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Agriculture, Turf and Ornamental Use: After thoroughly mixing **Argosy RF** with water, at the appropriate dilution ratio, add chemicals while continuing agitation to allow proper dispersion of ingredients in the diluted **Argosy RF** matrix. Most spray equipment with either in tank mixing or tank to pump recirculation will suffice. Regardless of method of application, thorough wetting of all surfaces must be accomplished for best results. **Argosy RF** may be used with most agricultural products, unless individual labels specifically prohibit polymers.

Apply as a 0.125 to 1.3% solution (1 pint to 1 gallon of Argosy RF per 100 gallons of finished solution).

Mixing Instructions:

1. Fill tank with 1/4 to 1/2 of the total amount of water.
2. Begin vigorous agitation.
3. Add **Argosy RF** slowly while maintaining vigorous agitation.
4. Agitate until **Argosy RF** is completely dissolved. **Argosy RF** solution will appear nearly clear.
5. The appearance of small white particles may indicate the presence of hard water conditions, which may necessitate the use of a water softener.
6. Add desired chemicals per their directions, while continuing vigorous agitation.

Evaluation of chemical compatibility is the sole responsibility of the user.

Conditions of Sale

Seller warrants this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions and use. No one other than an officer of the seller is authorized to make any warranty, guarantee, or direction concerning this product. Because time, place, rate of application and other conditions of use are beyond the seller's control, the seller's liability from handling, storage, and use of this product is limited to replacement of the product or a refund of the purchase price.
