

POLYMER ADJUVANT

Argosy™ RF is a water soluble, environmentally safe polymer adjuvant composed of inert ingredients. It encapsulates pesticides keeping them on the leaf even through rain events and irrigation. When tank mixed, Argosy RF enhances wetting and adhesion, as well as facilitates uniform foliar distribution of the pesticide.

Benefits of Argosy RF Applications

STICKER

When sprayed on the leaf surface, Argosy RF enhances the adhesion of spray droplets to the leaf. Argosy RF also keeps the pesticide on the leaf surface even when irrigation or rainfall occurs, extending the life of chemical applications.

SPREADER

When combined with a pesticide, Argosy RF encourages uniform coverage of the product across the leaf allowing the active ingredient to be better absorbed by the plant.

ELASTICITY

The revolutionary elastic nature of Argosy RF allows the material to stretch as the plant leaf grows, keeping the application of the pesticide on the plant longer. This means fewer applications and longer efficacy.

DROUGHT TOLERANCE

Argosy RF is a retention agent. It has the ability to bind with water, keeping moisture on a targeted substrate longer.

**IT STICKS
IT SPREADS
IT STRETCHES**

Application Instructions

Apply as a 0.125 – 1.3 % solution (1 pint to 1 gallon per 100 gallons of solution)

See product label for complete directions for use.

Evaluation of chemical compatibility is the sole responsibility of the user.

Argosy RF with Glyphosate Stunts Glyphosate-Resistant Weeds

In field testing, Argosy RF was used along with labeled rates of glyphosate to control glyphosate-resistant weeds. Argosy was able to hold the herbicide on the leaf for an extended period of time and the result was stunted marestail weeds that never fully matured with many not going to seed. For small weeds that are 1 to 4 inches tall, use 4 to 8 ounces of Argosy RF per acre with the herbicide. For weeds over 4 inches tall, rates of up to 32 ounces of Argosy RF per acre may be required along with a labeled rate of the herbicide. Argosy RF will also extend the life of other foliar applied products, such as other pesticides and foliar nutrients.
