

Water-soluble Adjuvant & Humectant

Ingredient Disclosure:

Inert ingredients	2.2%
Water	97.8%
TOTAL	100.00%

CAUTION: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS: None

This product has been reviewed and was found to be non-hazardous per the GHS Standard.

WARNING: Do NOT Mix with oxidizers, alkaline soaps and detergents

CAUTION: Treated surfaces are extremely slippery

Product expires 1 year from date of manufacture.

DO NOT FREEZE

General Information

Argosy Blue is a polymer adjuvant, which when placed into solution with water and mixed with appropriate chemicals, enhances wetting, adhesion and facilitates the distribution with ambient moisture, thereby increasing protection during plant growth. When applied to berries, Argosy Blue forms a film to help prevent cracking. Argosy Blue stretches as the fruit grows to maintain coverage, even during rain events. Argosy Blue protects the integrity of the outer skin and cuticle of berries during final growth stages to prevent and reduce cracking. Argosy Blue also allows longer durations between chemical applications, resulting in less total chemical usage.

Directions for Use

Mixing Instructions:

1. Use 2-4 quarts of Argosy Blue per 100 gallons of solution.
2. Fill tank with 1/4 of the total amount of water.
3. Add Argosy Blue slowly while maintaining vigorous agitation.
4. Agitate until Argosy Blue is completely dissolved.
5. Add remaining water while agitating.
6. The appearance of small white particles may indicate the presence of hard water conditions, which may necessitate the use of a water softener.
7. Add desired chemicals per their directions, while continuing vigorous agitation.
8. Do not breathe spray mist.

Tank Mixes: Do not mix with pesticides or other chemicals without a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the product with water and the other ingredients. Agitate and let stand for one hour. If a precipitate forms, then apply the products separately.

Application Instructions:

Apply before berries become susceptible to cracking and re-apply as needed. Applications must be made at least 1 hour prior to a rain event. Thoroughly cover all berries with spray solution. An air blast sprayer is recommended.

Storage and Disposal

Do not contaminate water, food, or feed by storage and disposal.

Storage: Store only in original container. Do not reuse empty container. Keep this product under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by federal, regional and local authorities, by burning. If burned, stay out of smoke.

Conditions of Sale

Seller warrants this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions and use. No one other than an officer of the seller is authorized to make any warranty, guarantee, or direction concerning this product. Because time, place, rate of application and other conditions of use are beyond the seller's control, the seller's liability from handling, storage, and use of this product is limited to replacement of the product or a refund of the purchase price.
