

VitaGib®

Potato Uses

VitaGib® 40%

Soluble Powder Plant Growth Regulator

VitaGib® gibberellic acid (GA_3) plant growth regulator is highly effective in **stimulating uniform sprouting, providing more uniform development and aiding in maximum production.** It also plays a role in the of breaking dormancy of newly harvested potatoes that have not had a full rest period.

Application Instructions for Potato Seed:

- Apply 0.02 – 0.04 ounces of product (0.2 – 0.4 grams a.i.).
- Dip whole or cut seed pieces in a solution containing 0.2 – 0.4 grams of a.i. in 100 gallons of water prior to planting.
- **Note:** *Under high soil temperatures, use the minimum concentration for dormant seed. Do not treat rested seed pieces.*
