

ExAlt®

CONCENTRATED SOIL SURFACTANT

ExAlt® electrolyte solution improves the availability of nutrients in the soil and enhances the performance of fertilizer applications. ExAlt corrects compacted soils and eliminates soil “crusting”, making it easier for newly germinated seeds to pop through the soil. ExAlt flushes sodium from the soil profile while keeping needed micronutrients in the root zone. ExAlt provides a natural, eco-safe solution for long-term soil health.

For General Maintenance:

ExAlt may be used in maintenance applications to improve nutrient uptake, correct mineral build up, improve drainage, reduce black layer and stimulate plant growth.

For Curative Application:

For the treatment and rejuvenation of highly compacted soils, salt-contaminated soils, damaged soils affected by hydrophobicity and to aid in the recovery of soil damaged by soil borne pathogens.

WHY CHOOSE EXALT?

- 🌱 Solubilizes and releases important soil-bound ions
- 🌱 Flushes sodium from the root zone without stripping soil nutrients
- 🌱 Improves soil drainage
- 🌱 Stimulates deeper root systems
- 🌱 Reduces crusting and penetrates hard pan
- 🌱 Reduces soil compaction
- 🌱 Increases soil aggregation
- 🌱 Improves efficiency of fertilizers and other chemicals
- 🌱 Improves soil aeration

Active Ingredients

Humic Acids	35%
Water	65%

Applications

Maintenance Rate

Apply ExAlt at a rate of 16 - 32 fl. oz. per acre (0.35 - 0.70 fl. oz. per 1,000 ft²) every month throughout the growing season.

Curative Rate

Apply ExAlt at a rate of 16 - 32 fl. oz. per acre (0.35 - 0.70 fl. oz. per 1,000 ft²) every week for the first month followed by applications every month throughout the season
