

## ADVANCED HUMIC ACID SOLUTIONS

### THE KORBAN DIFFERENCE

Formulated with PERFORMANCE Organic Acids™, Korban® solutions deliver a wide range of humic acids sourced from Leonardite using a proprietary extraction process. These natural organic acids are designed to perform in both the soil and plant, promoting sustainable soil health, nutrient efficiency, and stress tolerance in turf. Korban® solutions are engineered to meet the demands of modern turf management, providing consistent results across a variety of conditions.

#### **KORBAN® SC**

- ✔ 0-0-4 + 2S High-carbon humic acid solution with excellent stability across various pH levels.
- ✔ Enhances nutrient solubility, uptake, and retention.
- ✔ Ideal for recovering stressed turf and improving soil structure.

#### **KORBAN® 12-0-2**

- ✔ Combines humic acids, slow-release nitrogen, and micronutrients for sustained turf health.
- ✔ Boosts color, root growth, and nutrient efficiency.
- ✔ Perfect for soil improvement and plant vigor.

#### **KORBAN® 0-0-13**

- ✔ Provides potassium acetate and chelated micronutrients for foliar fertilization during nitrogen black-out periods.
- ✔ Promotes strong roots, nutrient uptake, and microbial activity.

### Key Benefits

- ✔ Supplies organic carbon to improve soil fertility and promote long-term soil health.
- ✔ Enhances the solubility and availability of nutrients for efficient plant uptake.
- ✔ Improves soil structure, water retention, and cation exchange capacity for optimal root zone conditions.
- ✔ Supports the proliferation of beneficial soil microbes, fostering a balanced soil ecosystem.
- ✔ Compatible with most fertilizers, ensuring seamless tank mixing.
- ✔ Versatile for use in all applications, from established turf to new plantings and overseeding.
