

Microbial Water Soluble Powder

ACTIVE INGREDIENTS:

3.33×10^9 cfu *Bacillus amyloliquefaciens* per gram

3.33×10^9 cfu *Bacillus megaterium* per gram

3.33×10^9 cfu *Bacillus subtilis* per gram

5.00×10^7 *Saccharomyces cerevisiae* per gram

1.00×10^6 cfu *Trichoderma harzianum* per gram

INACTIVE INGREDIENTS:

Maltodextrin based culture medium

GENERAL INFORMATION

NutriWise™ WSP contains strains of microorganisms that utilize nutrients already present in the soil and atmosphere. These strains solubilize phosphate, unlock potassium in the soil into exchangeable forms and provide readily available sources of NPK for plants. NutriWise™ WSP is designed to improve soil structure and nutrient use

KEEP OUT OF REACH OF CHILDREN

WARNING

May be harmful if inhaled.

WARRANTY AND DISCLAIMER

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than the officer of Seller, is authorized to make any warranty, guarantee or direction concerning this product.

2. To the extent permitted by applicable law, the seller's liability for handling, storage and use of this product contrary to label instructions shall be limited to replacement of product or refund of purchase price.

NET WEIGHT

20 lb. (9.1 kg.)

APPLICATION INSTRUCTIONS

NutriWise WSP should be applied with a source of humic or fulvic acid. NutriWise WSP can be applied with 8-16 oz. of Spectra or 16-32 oz. of ExAlt per 100 gallons of solution.

Field Crops:

At or Before Planting: Apply NutriWise WSP at a rate of 1 to 3 oz. per acre.

In-furrow: Apply NutriWise WSP at a rate of 1 to 2 oz. per acre.

All Vegetable Crops (including but not limited to Cole Crops, Cucurbits, Leafy Greens, Peppers, Tomatoes, etc):

Transplant Water: Apply NutriWise WSP at a rate of 3 to 6 oz. per acre.

Drip irrigation/Drench applications: Apply NutriWise WSP at a rate of 2 to 3 oz. per acre every 2-3 weeks.

Nursery and Ornamentals:

Drip irrigation or drench applications: Apply NutriWise WSP at a rate of 3 to 6 oz. per acre every 2-4 weeks.

Trees and Bushes:

Transplant Water: Apply NutriWise WSP at a rate of 3 to 6 oz. per acre.

Drip irrigation/Drench applications: Apply NutriWise WSP at a rate of 2 to 6 oz. per acre every 2-4 weeks.

Turf:

Initial Application: Apply NutriWise WSP at a rate of 6 to 9 oz. per acre (0.15 to 0.21 oz. per 1,000 ft²). Product should be applied using flood jet nozzles.

Follow-up Applications: Apply NutriWise WSP at a rate of 3 to 6 oz. per acre (0.07 to 0.15 oz. per 1,000 ft²) every 2-4 weeks, preferably every 2 weeks. For monthly applications, use the high rate. Product should be applied using flood jet nozzles.

Mixing Instructions:

- Use a minimum of 40 gallons of water per acre.
- Fill tank with half of the required water.
- While maintaining agitation, add 2 to 4 oz. of Spectra per 25 gallons of solution.
- Add the balance of the required water with continued agitation.
- Be sure to maintain agitation when applying the solution.
- Do NOT apply pesticides within 3 days before and after NutriWise WSP is applied.
