

EMBELLA™

PREMIUM LIQUID FERTILIZER

Embella™ is a premium liquid fertilizer designed to enhance soil health and promote sustainable plant growth. It combines chitosan, amino acids, and a balanced blend of three carbohydrate sources—monosaccharides, disaccharides, and oligosaccharides—to support microbial activity, improve nutrient availability, and provide plants with stress relief. This unique formula nourishes beneficial microbes, boosts soil fertility, and promotes healthier, more resilient plants.

Embella is an excellent companion product for **RemeD8™ WSP**, enhancing the benefits of microbial soil inoculation.

BENEFITS OF EMBELLA

- 🌱 **Microbial Nourishment:** Provides a steady energy source for soil microbes, supporting healthy populations.
- 🌱 **Enhanced Nutrient Availability:** Aids in nutrient breakdown for better plant absorption.
- 🌱 **Improved Soil Structure:** Boosts soil aeration, moisture retention, and organic matter.
- 🌱 **Reduced Nutrient Loss:** Minimizes leaching, keeping nutrients in the root zone.
- 🌱 **Water Efficiency:** Enhances soil's water-holding capacity.

Chitosan Advantage:

- Supports root growth and enzyme activity.
- Enhances beneficial microbes and natural disease resistance.
- Improves moisture management by reducing transpiration.

Amino Acid Support:

- Helps plants recover from stress.
- Enhances nutrient uptake and metabolism.
