

Guaranteed Analysis

Active Ingredients

Humic Acids	35%
Water	65%

Applications

Apply ExAlt at a rate of 4-16 fluid oz. per acre at planting and then every two weeks throughout the growing season.

Do Not Mix With Selective Herbicides when used at a rate higher than 4 oz./acre.

Check label for specific rates and timing of applications.

ExAlt[™]

CONCENTRATED SOIL SURFACTANT

ExAlt[™] is a concentrated soil surfactant that boosts nutrient availability and enhances fertilizer performance. It breaks up compacted soils, prevents crusting for better seed emergence, and flushes sodium while retaining essential micronutrients. ExAlt offers a natural, eco-friendly solution for long-term soil health.

For General Maintenance:

ExAlt may be used in maintenance applications to improve nutrient uptake, correct mineral build up, improve drainage, reduce black layer and stimulate plant growth.

For Curative Application:

For the treatment and rejuvenation of highly compacted soils, saltcontaminated soils, damaged soils affected by hydrophobicity and to aid in the recovery of soil damaged by soil borne pathogens.

Rescue Application:

ExAlt remediates flood-stressed or over-fertilized areas, treats and rejuvenates compacted soils, detoxifies salt-contaminated soils, and remediates soils impacted by poor water quality.

WHY CHOOSE EXALT?

- Solubilizes and releases important soil-bound ions
- > Flushes sodium from the root zone without stripping soil nutrients
- Number of the second se
- 🔊 Stimulates deeper root systems
- Reduces crusting and penetrates hard pan
- Reduces soil compaction
- Increases soil aggregation
- Improves efficiency of fertilizers and other chemicals
- Number of the second se
