

VERGENCE™ CA

PREMIUM 5% CALCIUM SOLUTION

Vergence™ Ca is a liquid calcium solution designed for foliar use on turfgrass. It delivers calcium in the acetate form, which is highly soluble and readily absorbed by plant tissue. This allows for fast uptake and effective correction of calcium deficiencies during periods of stress or high demand.

Calcium plays a vital role in strengthening cell walls, supporting root development, and maintaining nutrient balance. Vergence Ca helps improve turf durability, nutrient efficiency, and resilience to environmental stress. Its flexible application rates make it easy to integrate into most turf nutrition programs.

THE VERGENCE CA ADVANTAGE

- Delivers calcium in a highly soluble, readily absorbed acetate form
- Supports healthy cell wall development and turf durability
- Enhances calcium uptake and movement within plant tissue
- Aids in managing abiotic stress conditions (traffic, drought, salinity)
- Contributes to better nutrient balance and turf performance
- Fast foliar response allows for timely intervention and correction
- Compatible with most fertilizers and commonly used turf inputs

Derived from calcium acetate

Applications

Foliar Applications:

Apply 1–4 quarts per acre in 25–100 gallons of water

Spot or Small Area Treatment:

Apply 4–8 oz. in 5–10 gallons of water per 1,000 ft²

Frequency:

Apply every 7–10 days or as needed
